

THE LAZER'S EDGE

Recycle

Reduce

Reuse

Saving you money while helping our environment!

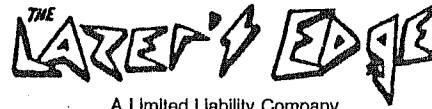

Here are a few good reasons to recycle your printer cartridges:

- * About 8 cartridges are thrown away in the United States every second.
- * It takes about a gallon of oil to make a new laser cartridge.
- * 70% of printer cartridges throughout the world are currently being thrown out.
- * Every cartridge reused is one less cartridge thrown into our landfills.
- * Every remanufactured cartridge saves nearly 3 and 1/2 pounds of solid waste from being deposited into landfills.
- * Remanufacturing cartridges reduces pollution. Almost 90% of empty cartridges are incinerated or dumped in landfills.
- * In just one year, if the world's discarded cartridges were stacked end-to-end, they would circle the earth over three times.
- * Recycling cartridges is environmentally friendly and you can feel good about conserving our limited natural resources and not adding to our already overloaded landfills.
- * A laser toner cartridge thrown into our landfill can take up to 40 years to decompose.....

Lazer's Edge is providing consumers and businesses with an alternative to protect the future of our environment. This proactive solution to waste reduction is a Win/Win for consumers, businesses and the environment.

The Lazer's Edge is a woman owned and operated small business located in Bossier City since 1989. We specialize in compatible toner cartridges for laser printers, copy machines and fax machines. We also sell compatible inkjets, drum cartridges and service laser printers. The products produced by The Lazer's edge have been independently tested and verified to be equal to new OEM cartridges. We use the latest technology and processes to complete our jobs. Our technicians have been specially trained to use these techniques to deliver dependable quality you can trust.

FREE PICK UP & DELIVERY

Our 100% Guarantee

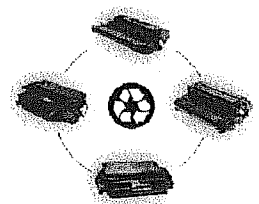

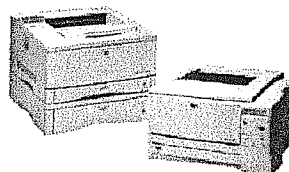

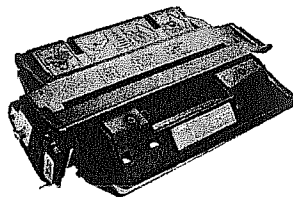

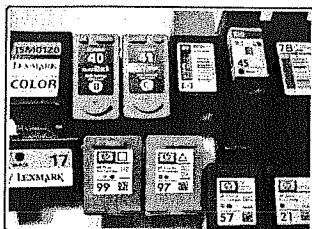

If you are dissatisfied with the results of any of our products, please return them within 90 days of purchase to The Lazer's Edge. We will either repair the cartridge or provide a full refund.

Laser Printer Service

We turn them on, we turn them off. That's really it--until there's a problem with your printer. Of course that's usually when you're facing a deadline or need to do payroll! That line down the middle, is it the fuser going out? Is it the cartridge? Who knows!

WE DO! Think of us as your own staff, readily available to get your laser printers back on-line. We have service technicians with more than 15 years of experience and we give free estimates.

The Lazer's edge also warrants that subject to the conditions above and under normal use, our cartridges will not cause damage, abnormal wear, or deterioration to any compatible equipment.

THE LAYER'S EDGE

1. For every cartridge that is remanufactured , approximately 2.5 pounds of plastic is withheld from the waste stream. It takes about 40-50 years to decompose.
2. The manufacturing process involved in making a new cartridge requires the burning of fossil fuel, specifically oil or natural gas. On average, three quarts of oil are burned to make a new cartridge.
3. As an industry, we conserve more oil in each month than was spilled into Alaska's Prince William Sound by the Exxon Valdez in 1989.
4. Executive order 13101 mandates federal preferential purchasing policies for products that benefit the environment.
5. The EPA has included remanufactured toner cartridges on the list of preferred products and has proclaimed that remanufactured products are as good as new.
6. State and local economic development organizations actively recruit environmentally friendly businesses. They consider any economic benefits provided by the businesses to be icing on the cake.
